Feature: User Login

This document describes the Gherkin scenarios created to validate the login functionality of the SauceDemo application.

Scenario 1: Login with valid credentials

Given the user is on the SauceDemo login page
When the user enters a valid username
And the user enters a valid password
And the user clicks the Login button
Then the user should be redirected to the products page

Scenario 2: Login attempt with empty fields

Given the user is on the SauceDemo login page
When the user clicks the Login button without entering any credentials
Then an error message should be displayed indicating that required fields are missing

Scenario 3: Login attempt with invalid credentials

Given the user is on the SauceDemo login page
When the user enters an invalid username
And the user enters an invalid password
And the user clicks the Login button
Then an error message should be displayed indicating that the credentials are invalid
